Python

Even or Odd Number

Write a Python program that asks the user to enter a number.
Your program should print "Even" if the number is even, and "Odd" if the number is odd.

Even Or Odd

```python
# Ask the user to enter a number
number = int(input("Enter a number: "))

# Check if the number is even or odd using the modulus operator
if number % 2 == 0:
    print("Even")
else:
    print("Odd")

```
