Python

Largest of Three Numbers

Ask the user to enter three numbers.
Your task is to print which number is the largest among them.

اتعلم ببساطة

```python
# Ask the user to enter three numbers
a = float(input("Enter first number: "))
b = float(input("Enter second number: "))
c = float(input("Enter third number: "))

# Compare the three numbers
if a >= b and a >= c:
    print("The largest number is:", a)
elif b >= a and b >= c:
    print("The largest number is:", b)
else:
    print("The largest number is:", c)
```
